CoreForm

Corporate Brochure

Why work with
Coreform?

We improve our customers' lives through our technology offerings and lead the industry by setting new benchmarks in customer service standards

- You get the right technology
- Best-in class service and support
- Flexible finance options
- Solution-based recommendations
- Proven and experienced

What we offer?

Better customer engagement drives revenue, lowers costs, improves compliance, and reduces risk!

Services

We partner with you to digitally transform your print, document and data needs. The services we offer provide tangible cost saving ideas for companies through customised planning, deployment and integration programs.

Solutions

Redefine your business as a modern workplace with digital document management and print solutions to reduce costs and increase productivity.

Technology

We're vendor agnostic, focusing solely on what your business needs without a conflicting agenda, finding your perfect solution from a range of leading vendors.

Our services & solutions

It`s hard to keep up with the changing digital world every day. Isn`t it?

CoreForm's Digital Transformation consultancy takes the time to understand your current state and how we can digitally automate your business processes to achieve the results you want.

We'll help you take control of your digital information via scanning, document life cycle mapping, managing online forms, introducing AI for business processes and implementing mobile workflows.

- Take control of you company`s data and documents
- Stop wasting time on document management and improve staff efficiency
- Achieve ROI within 12 months

Managed Print Services

CoreForm's Managed Print Services is one of the fastest ways to automate your business processes and turn your business into a productivity machine. We deliver problem-free print and copy services, giving your team access to the functionality they need wherever they are.

- Reduce operating costs through automation and process efficiency
- Streamline support to ensure service availability
- Scale up or down based on business demand

Our services & solutions

Document Management

CoreForm's Document Storage and Indexing Solutions help curb the paper explosion and associated real estate costs. Our digital records management strategy means your data is safe, secure and searchable.

- Save money and time across every area of your business
- Up to 50% FTE head count reduction in document processing needs
- Return on investment within 12 months

Workflow Automation

The amount of time a knowledge worker spends on repetitive tasks affects your business's bottom line. Things like data entry, validating, cross-checking are all activities that can be automated through a workflow automation platform.

- Increase Accountability and Reduce Micromanagement
- Provide better customer service
- Reduce errors and avoid duplication

Our services & solutions

Accounts Payable Automation

Whatever format your invoices arrive, our Accounts Payable Automation solution integrates with your existing approval process and uses machine learning technology to save you time and frustration.

- Reduce the number of hours staff spend processing invoices
- Simplify onboarding for suppliers and different invoice types
- Speed up your invoice approval process

Smart Data Capture

Data that is valuable to your business is trapped in your documents – actionable data that you can turn into business intelligence, increase security and efficiency. CoreForm's Document Management Software captures your documents and turns them into machine readable, indexed files – with minimal human intervention – improving your document capture workflows and increasing searchability.

- Unlock more than 80% of information that is trapped in unstructured content
- Reduce costs of manual indexing and filing
- Improve document workflows, distribution and communication

Our services & solutions

Robotic Process Automation

Robotic Process Automation uses robotic software applications to replace your workers repetitive manual tasks. It can mimic keyboard strokes to replace processes such as data entry and other low-value tasks, giving you the freedom to devote knowledge workers to higher-value strategic activities.

- Reach better accuracy
- Increase speed and productivity
- Remove non-value-add activities and relive employees from the rising pressure of work

Mobile Print & Cost Recovery

With more and more of us working from mobile devices, the demand for printing securely from wherever you are is increasing. Whether it's printing a document in the office while working from home, or from the other side of the world, CoreForm's Mobile Print can make it happen.

- Maximise BYOD policies and empower users with increased productivity
- Reduce costs across your print network with control features
- Modernise your workforce with flexible print and document sharing options
